

The Art of Access: Public records for career and everyday life

April 12, 2014

Investigative Reporters and Editors
Society of Professional Journalists
and the University of Arizona School of Journalism

Tucson, Arizona

David Cuillier, Ph.D., was chairman of the Society of Professional Journalists Freedom of Information Committee 2007-2011, has been an SPJ newsroom trainer since 2005, and is currently president of SPJ. He is an associate professor of journalism and director of the University of Arizona School of Journalism, where he teaches public affairs reporting, computer-assisted reporting and access to public records. Before entering academia he was a public affairs reporter and city editor for a dozen years at daily newspapers in Idaho and Washington state. He is co-author with Charles Davis of *The Art of Access: Strategies for Acquiring Public Records* and researches the psychology of access. He provides news and tips about FOI at www.theartofaccess.com and <http://blogs.spjnetwork.org/foi/>, and he can be reached at 520-626-9694 or cuillier@email.arizona.edu

Agenda

Unlocking the Power of Public Records

Part I. The stories

1. FOI laws in action.....	2
2. Classic 5 FOI stories.....	4
3. Records for your beat.....	5
4. Creating a document state of mind.....	11

Part II. Strategies for accessing records

1. Flow chart.....	13
2. Doing FOI when you are SOL.....	14
3. Planning your FOI request.....	15
Learn the law	
Know the record	
Request the record	
4. Sample request letters.....	19
5. Overcoming denials	22
6. Lowering copy fees.....	26
7. Soft tactics and principled negotiation.....	27
8. Hard tactics.....	28
9. Posting data online.....	32
10. Data ethics checklist.....	33
11. Top-10 meeting red flags	34
12. Access resources.....	35

FOI laws in action

Stories using state records laws

- **Government waste:** The Los Angeles Times won the Pulitzer in 2011 for exposing corrupt officials in the small town of Bell, Calif., where the city manager was making \$1.5 million a year in total compensation.
- **Property insurance:** The Sarasota Herald-Tribune, a 66,000-circulation daily newspaper in Florida, won the 2011 Pulitzer in investigative reporting for examining state property insurance system records, finding insurers demanding more money from homeowners despite no hurricane in five years.
- **Recession-proof government:** In March 2010, the Syracuse Post-Standard examined New York state payroll records to find that the state hired more than 51,000 employees at a cost of \$1 billion despite the governor calling for a hiring freeze.
- **Criminal cabbies:** Using driving and criminal records obtained under Georgia Open Records Laws, the Atlanta Journal-Constitution found that 72 percent of taxicab drivers had a serious violation on his or her personal or professional driving record, ranging from excessive speed to DUI. Over seven years, 622 taxicab drivers have had their licenses suspended, including 94 who currently have a suspended driver's license. What's more, the investigation found 63 taxicab drivers with criminal records in Georgia, including 10 who had spent time in prison. The charges included armed robbery, child molestation and kidnapping.
- **Drivers of death:** In April 2002 KIRO-TV in Seattle reported that a public transportation program for the disabled has covered up fatal accidents. The reporters managed to obtain documents revealing the flaws in the system -- incident reports, autopsy reports, wrongful death lawsuits, trip reimbursement vouchers, etc. Another finding is that many of the van drivers had extensive felony records.
- **Campus sexual assaults.** In February 2010 the Center for Public Integrity and a consortium of non-profit investigative reporting organizations gleaned federal and local data to find that universities routinely underreport sexual assault statistics and fail to adequately pursue cases.

Stories using the federal Freedom of Information Act (FOIA)

- **Unsafe bridges:** Using a database Inventory of Bridges from the Federal Highway Administration in 2000, the Boston Globe found that the rate of problem bridges - with structural defects or with design flaws that make them too narrow, poorly aligned with roadways or unable to carry larger vehicles - is the third worst in the country. Nearly 40 percent of the 4,995 bridges in Massachusetts rate low enough to qualify for federal repair funds - a situation that state officials said posed a threat to public safety.
- **Vulnerable airports:** After the 9/11 terrorist attacks, CNN.com used a Federal Aviation Administration Enforcement database to find that the three airports where the terrorist attacks originated had the first, third and fourth lowest weapons detection rates among the 25 largest U.S. airports.
- **Rape in the military:** In 1995 the Dayton (Ohio) Daily News used the Act to learn that women in the military endured cavalier responses to charges of rape brought against enlisted men and officers, many of whom had faced multiple charges. In 1993 that newspaper perused Occupational Safety and Health Administration databases obtained through the Act to identify the most dangerous work places in the country.
- **Radiation victims:** After the Albuquerque Tribune filed requests for information on victims of governmental radiation experiments in the early 1990s, Department of Energy Secretary Hazel O Leary began a departmental program to identify and make public widespread abuses of past radiation experimentation.
- **Night accidents:** In the late 1980s an Orange County (Calif.) Register reporter showed that hundreds of servicemen were killed or seriously injured in accidents relating to their government-issue night vision goggles, with the Pentagon attributing the accidents to "pilot error."
- **Workplace health risks:** In 1985 the Public Citizen Health Research Group used the Act to find that government had identified 250,000 workers in 249 work places who faced increased risks of cancer, heart disease and other illnesses because of their work environment — but that it had not notified the workers of the risks.
- **Government waste:** Other reporters have used the Act to identify wasteful government spending. In the early 1990s a request by an Associated Press reporter led to a story about a little known \$200 million federal program to advertise U.S. food and drink overseas. Monies were going to companies such as McDonald s, Burger King, Pillsbury, Dole, M&M-Mars and Jim Beam — all of whom had substantial advertising budgets of their own to draw on.

FOI classic top 5 stories

By Joel Campbell

1. **Bus drivers.** Get a list of bus drivers from your local school district and compare the list to driving records our court records at your county courthouse. While driver licenses are now off limits because of federal law, many states still allow access to driving records including DUI arrests. DUI convictions may also be available through local court records. Or, get a list of all the sex offenders in your state and match the list with school bus drivers. This kind of story can be done with just about any list of public employees that are entrusted with children or other vulnerable populations (e.g., daycare workers, nursing-home workers). Often, public agencies don't do background checks on new hires, even if they are supposed to by law.
2. **Settlements.** Check on claims and out-of-court settlements at City Hall. Most claims and litigation with local governments never make it to court. You should look at the kinds of settlements that your local city is making with citizens. It's usually surprising the kind of money cities and towns spend each year on claims for accidents and injuries. There are usually some pretty good stories buried in the information, i.e. a woman fell through an open manhole or a kid was seriously injured at a playground.
3. **Budgets.** Get a copy of the budget for the last five years. Whether it is a school district, county or city budget, uncovering the largest increases and decreases in budgets can lead to some great stories. What's tied to the 50 percent increase in the police budget or what effect has a decrease in human service programs had in your area?
4. **Crime.** Get a copy of local crime statistics reports. Each year, police agencies have to compile crime statistics. Take a tough look at increases and decreases in crime. This record should lead to some stories and trends, budgets and resources.
5. **Salaries.** Ask for the salaries of all of the employees and officials in the local county or city government. You might be surprised what you find including high-paid political contributors and poorly qualified people in top jobs. Stories about salaries and outside contracts of top college coaches also make good stories.

Records for your beat

Prepared by David Cuillier

Below are just a few of the many different public records that are typically available in most towns. Some are available online but many you have to actively request.

Health and Social Services

- **Air quality.** Air quality violators are fined by county and state air quality departments.
- **Nursing home inspections.** To identify unsafe nursing homes. Can get comparisons nationally by Medicare at <http://www.medicare.gov/NHCompare/Include/DataSection/Questions/SearchCriteria.asp?version=default&browser=IE%7C7%7CWinXP&language=English&defaultstatus=0&pagelist=Home&CookiesEnabledStatus=True>.
- **Child-care complaints.** To assess how well child-care (daycare) is handled in your community and how well the government monitors child care.
- **Coroners reports.** Generally open to inspection to see the cause of an unusual death.
- **Environmental.** Toxic release inventory information provides what bad stuff different companies and industry release in your community. A good site to find that EPA information is at the Right to Know Web site: <http://data.rtknet.org/tri/>. Government also monitors other environmental hazards, such as leaking underground gas tanks.
- **Restaurant inspections.** To make sure the public is protected from unsanitary conditions at restaurants and other venues.

Education

- **Educational records.** Anything related to the education of a student is secret because of FERPA, except for directory information, including name, year, home address, phone number, date of birth etc. (unless the parent or adult student wishes the information to not be disclosed). See <http://www.ed.gov/policy/gen/guid/fpco/ferpa/index.html>. Also, serious criminal incidents are public.
- **School test scores.** To identify poorly performing schools. Check with individual schools, school districts or the state board of education.

City Hall and state/fed

- **Abandoned buildings.** Identify trends in deteriorating neighborhoods.

- **Airport noise.** Airports track noise complaints from neighbors when jets fly low or are particularly noisy. Ask to see airport noise maps and flight pattern maps.
- **Audits.** To monitor problems in government agencies, particularly financial woes. Look carefully to find any irregularities – often clouded by vague terms and wishy-washy language. Ask to get more details.
- **Bridge inspections.** To assess the safety of bridges in the community. Inspection records are maintained by states and the Federal Highway Administration (<http://www.fhwa.dot.gov/bridge/britab.htm> - click on "Download NBI ASCII files").
- **Budgets.** Detailed budgets are available before and after approval. Can be helpful to see what departments are getting more money over time and what areas are getting less funding. Get them from the agency's budget officer.
- **Calendars.** To find out how top officials are spending their time. Look at their calendars, or day schedules, to see who they are meeting with and the extent of their workload. Should also be able to get travel expenses. Request from the office you are interested in, such as the mayor's office if you want to see the mayor's calendar.
- **Contracts.** Allows you to find out who is benefiting from government projects. Should include the amount agreed upon, the amount paid (often more), who the money went to, etc. Contact an agency's business office.
- **Development.** To identify development trends and potential building that could impact the community or a neighborhood. Find out what permits for development have been submitted and approved for an area. Go to the city planning and development department to see development plans.
- **E-mail.** To monitor government function and make sure business that should be conducted in public isn't being handled secretly via e-mail.
- **Elections.** To see who is funding candidates and campaigns. Federal records are kept by the Federal Elections Commission.
- **Employees.** To identify cronyism and find former employees. Request employee names, titles and salaries. Employee home addresses and home phone numbers, however, are generally not public.
- **Expense reports.** To monitor government spending and see if government employees are cheating the system. Check with the business office of an agency. Can ask for credit-card logs as well.
- **Liquor licenses.** To identify bars and restaurants that are nuisances (have a lot of bar fights and problems for neighbors) and not following liquor laws.
- **Licensing.** The state monitors a variety of professionals, including barbers, beauticians, accountants, appraisers, chiropractors, nurses, Realtors, etc. See if a person is licensed or has had a license revoked.
- **Meeting minutes.** To monitor city councils, school boards and other government bodies. Meeting notices, agendas and minutes are almost always public. Check with the clerk's office at the respective agency.

- **Odor complaints.** Most municipal sewage treatment plants track complaints of their sewage stink, which enables people to identify trends and know where not to buy a house.
- **Personnel records.** Confirm whether someone is a public employee and identify bad workers through disciplinary records. Not always public in all states, so can be difficult to get, such as disciplinary actions against teachers. Easier to get for high-ranking officials because a greater public interest. Performance evaluations are public in many states.
- **Pet licenses.** To examine trends in pet ownership and dog bites. Includes information about licensed animals (name, breed, last rabies shot, etc.), as well as name of owner, address and phone number.
- **Property taxes.** To assess whether everyone is paying their fair share of property taxes and also to find who is buying what in the community. Property tax records are public at county courthouses. You can find out how much homes in your neighborhood are worth, what they sold for, along with details, such as the homes' square footage and number of bedrooms.
- **Public records requests.** To find what public records are being requested by businesses, citizens, government employees and journalists. Request from the public records officer copies of the public records request and any log used to track requests.
- **Retention schedules.** To find out what records an agency keeps and when it purges them. Most public agencies have established retention schedules to determine how long they will keep different records and when they can get rid of them. Check with the individual agency to find its retention schedule, usually held by a clerk or records officer.
- **Salaries.** To find cronyism and disparity in pay. Names, titles and salaries of public employees are almost always available. Also, get overtime pay and actual pay (not just budgeted salary) to find janitors who make more than the mayor. Also, a good way to find former employees.
- **Street maintenance.** Examine trends in bad streets and who gets them fixed and who doesn't. Check with your local street department.
- **Taxi inspections.** To assess the safety of taxis check with the local licensing agency.
- **Voter registration.** To see whether people, particularly candidates, have voted or lived in a community. Also to prevent voter fraud (can check to see if dead people are voting). Voter registration records include name, address, year of birth, party affiliation, and whether a person voted in previous election (but not how they voted).
- **Zoning.** To analyze growth planning and find who is benefiting by development. Find out how land is zoned and what development is possible. Also look at comprehensive plans, which map out the general future of a community.

Cops and Courts

- **Arrest reports.** Verify the arrest of a specific person in connection with a specific event. Available at local law enforcement offices, usually from a public information officer or officer in charge. If the case is still under investigation (someone's still on the loose or they haven't forwarded the information to the prosecutor yet for potential charges), then policy may keep some of the information secret if it would harm the investigation.
- **Arrest warrants.** To ensure fairness in the arrest of suspects and get a lead on potential big busts. An arrest warrant is signed by a judge authorizing the arrest of someone for probable cause. It usually allows police to barge into a house and make an arrest when there is reason to believe the person has committed a crime (drug house, homicide, etc.). Often warrants have a lot of information because police are trying to justify to a judge the need to arrest the person. These are similar to search warrants, which also require justification and approval by a judge. Warrants are usually made public once the person is served (arrested or searched), or when it appears it won't be able to be served (the person skipped the country).
- **Autopsy reports.** Confirm cause of death or circumstances of a person's death and evaluate the quality of medical examiners. Might be closed in connection with pending criminal investigations or to protect personal privacy.
- **Bankruptcy files.** To identify trends in bankruptcies, spot fraud, and find people with unfortunate financial pasts. Chapter 7 is a straight bankruptcy and Chapter 11 is a reorganization that usually allows them to stay in business. Businesses in bankruptcy lose a fair amount of privacy as the files list assets, how they got into trouble and what they intend to do to get back on their feet.
- **Civil lawsuits.** To make sure civil cases are handled equitably and disputes resolved fairly. When a person sues another person, the case ends up in civil court. Examples of civil cases include malpractice, child support, divorce, libel, paternity, property rights, restraining orders and breach of contract. Superior Court handles big cases and municipal courts (small-claims) handle the little things (like you see on *Judge Judy*).
- **Claims.** If someone feels a government agency owes them compensation for damages (slipping on a sidewalk, hit by police car, etc.), they often file a claim before filing lawsuit. Check with the risk management officer or attorney for the agency.
- **Code enforcement.** To examine trends and fairness in applying local nuisance laws. Code enforcement records detail noise violations, illegal businesses in residential zones, illegal dumping, huge signs, and other problems.

- **Crime log.** A barebones list of incidents, usually including address, time/date, one-word description, and disposition. Also called a “police blotter.”
- **Criminal records.** To find trends in crime, monitor the criminal justice system, and find backgrounds of individuals. Compilations of criminal histories are closed in many other states, but you can get court records from individual courthouses and piece together a history.
- **Court records.** To find if someone has a criminal background or has been sued in civil court. Also to monitor trends in a variety of criminal justice issues, including crime, sentencing, racial profiling (speeding tickets), and judge performance. In general, court records are public unless they have been sealed by a judge for a specific reason.
- **Drug houses.** Find location of homes that were once used as meth labs or other clandestine drug labs. To identify trends in drug houses. Can also see if any homes in your neighborhood had drug problems (or a house you are thinking of buying). Provided by the U.S. Drug Enforcement Administration.
- **Fire incident reports.** To monitor fire departments and spot trends, such as arson, dangerous homes, public buildings that are hazards, etc. Check with the fire agency to examine incident reports.
- **Graffiti.** Track decaying neighborhoods and hooliganism.
- **Jail records.** The jail log is a list of people booked in the jail, including name, time/date, and charge. More detailed information can be found in the booking sheets. Also can get jail mugs and examine budgets, jail population statistics, and overtime to monitor operations.
- **Lawyer discipline.** To find lawyers who have been disciplined and monitor the oversight of attorneys.
- **911 Logs.** To spot trends in crime, medical calls and response times by police officers and fire trucks. They typically list time/date, location, call type and responding units.
- **Parking tickets.** To identify parking scofflaws and trends and fairness in ticketing (any special persons get their tickets waived?).
- **Probate.** To make sure possessions are disbursed fairly and find family members of the deceased. When someone dies and leaves property or doesn’t have a will, it goes through probate – the government has to figure out how to fairly divvy up the goods. Check the courthouse.
- **Sex offenders.** To find if sex offenders live close to vulnerable populations. Note that a variety of studies have found registries to be relatively inaccurate, so the person may or may not actually live where the registry says the person lives.
- **Stolen vehicles.** To identify trends in vehicle theft. Request stolen vehicle data to analyze popular makes, models and locations of car thieves.
- **Traffic accident reports.** To find out dangerous intersections and stretches of roads. You can analyze the federal Fatality Analysis Reporting

System data for every fatal accident in the nation going back to 1975 (<http://www-fars.nhtsa.dot.gov/Main/index.aspx>).

- **Use of force.** Look at how police use – or overuse – force during arrests. Each time an officer uses a choke hold, gun, taser, police dog, baton or other use of force a form is filled out.

Business

- **Corporate records.** To spot connections between public companies and identify key officers. The federal Securities and Exchange Commission provides a wealth of information on public companies online, including initial public offering files (Form S-1), quarterly reports (Form 10-Q), annual reports (Form 10-K), and top officer information (Form DEF 14A). Can search the clunky Web site www.sec.gov or also search EDGAR (www.sec.gov/cgi-bin/srch-edgar) and enforcement records for folks who got in trouble (www.sec.gov/cgi-bin/txt-srch-sec).
- **Gas-pump inspections.** To make sure gas stations aren't ripping off consumers.
- **Incorporation records.** To find out who owns a business. Look up city business licenses at the finance department at City Hall. Find state incorporation records at the Secretary of State's Office.
- **Price-scanning inspections.** To assess which stores might be ripping off consumers. Find it at your state office of weights and measures.
- **Worker safety.** To identify dangerous workplaces and trends in workplace accidents. Look at the Occupational Safety and Health Administration records at <http://www.osha.gov/oshstats/index.html>.

Arts, Culture and Lifestyle

- **Census.** Demographic data available down to the block group level and over time can be used to analyze shifts in community demographics, including in migration, income, race, education, gender, and age. Challenging to burrow through the Census Web site (www.census.gov), but it's all there.
- **Nonprofit 990 forms.** To make sure nonprofits are actually not out to make a profit and just using 501c(3) status to avoid paying taxes. Also can find a variety of information about nonprofits' income, expenses and officers through the 990 forms they file annually. To see 990 forms, go to www.guidestar.com. You have to register but most of the site is free.

Creating a document state of mind

- 1. Follow the money.** Ask for the detailed line-item budget, maybe as an Excel file, that details all spending, not just total expenses and total revenues. Look for other documents that might outline the details. Where is that money going?
- 2. Map the activities.** Now, map the agency to find out what it does. Look on their websites and you'll often find organizational charts that can help jump-start this process. What sorts of documents might be generated by the activities of this office? The mayor is awarding a \$100,000 grant to a local arts group. What questions does that raise in your documents-driven mind? Look at blank forms that people fill out to get a sense of what is kept.
- 3. Circle of light.** If you are backgrounding a person, get a sheet of paper or a white board and write the person's name in the middle. Around the name write down different roles the person has in life (e.g., married person, business owner, driver, pet owner, property owner, pilot). Then write down for each role the records available.
- 4. Look at records lists.** Many public offices maintain an index of records or retention schedule – a master list of documents routinely filed. Also, ask for a log of previous public records requests. You'll get a sense for what kinds of records the agency keeps.
- 5. Train the agency.** Get the agency used to you asking for records. Ask for tame records, such as reports, expenses and contracts. Ask for e-mails of the mayor for the past week. Then work up from there. When you find you really need those e-mail records they'll be accustomed to giving out that kind of information.
- 6. Blend in.** Each week take a few hours to go to your agency and talk to workers. Ask what they do, what they are working on, and what records they keep.
- 7. FOI First on Fridays.** Every Friday (or whatever day of the week works best for you), submit a public records request. Track your requests in a notebook and follow up. Get in the habit of doing it.
- 8. Explain to the public.** Get in the habit of explaining what records your information is based on and how people can get them on their own. Create a "Doc Box" for each story explaining the basics of the record, what's in it, and where to get it.

Backgrounding government

Here are a few examples of how to background your local government agencies to find out what documents they have that can help you:

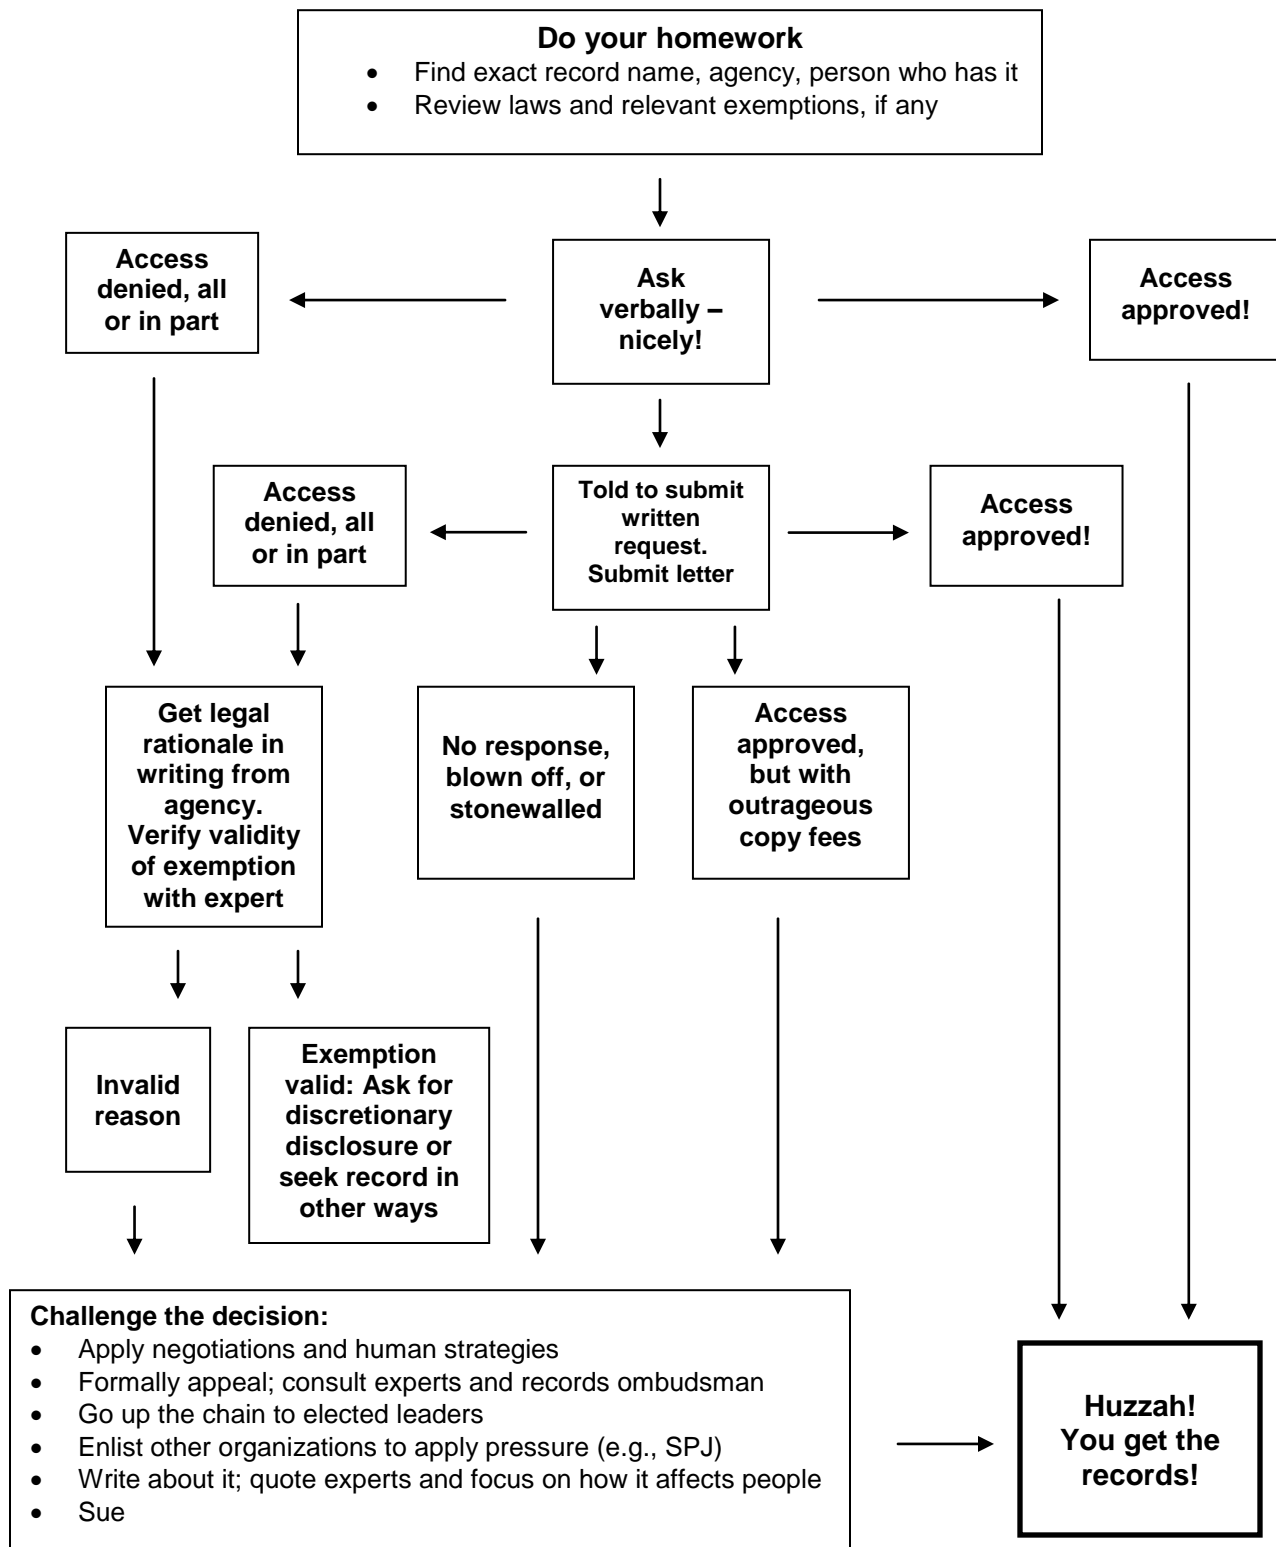

Go to the city and ask for the master index or retention schedule. Here's a sample list of records in San Francisco's index:

- Administration
- Accident-Injury Reports
- Administrative Files
- Audit Reports
- Budget Files
- Check Payments
- Conflict of Interest Form 700
- Contracts & Grants
- Discrimination and Harassment Complaints
- Draft Contracts
- Family Medical Leave Act Records
- General Correspondences
- Medical Information
- Office Expenditure Documents
- Payables (Invoices/ Vendors)
- Payroll Reports/ Timecards & Related Documents
- Personnel Files
- Policies/Procedures
- Purchase Orders (copy)
- RFA, RFP, RFQ(s) & Records
- Receipt/Deposits
- Travel Request (copy)
- Work Orders
- Worker's Compensation Record

Just think for a minute about how many stories lie in this data!

Now that is thinking documents-first!

Part II: Strategies for accessing records

Doing FOI when you're SOL

- 1. Surprise yourself.** Look at public records as birthday presents. Because turnaround on requests can take days, weeks or months, (and sometimes years), submit requests for documents that could yield a good follow-up story or project. Then when you get a box in the mail three months later it will be like opening a present. Squeeze those record-based projects around the daily work.
- 2. Minimum story.** When you submit a public records request, always have a "minimum" story in mind – something you might be able to produce fast, or a launching pad for a project. No use fishing for stories with random records requests. That can waste time.
- 3. Keep request forms handy.** Carry request forms and a copy of your state open records law in your bag. Fill out requests on the spot if you are at a city council meeting or at the police station.
- 4. Tracking system.** Develop a good system for tracking requests. It can be as simple as a binder with a sheet of paper for each request. Some reporters use Excel. Every time something new happens with the request (response from agency, your response back, etc.), note the date, who you talked to, and what was said. Always agree to changes in your request in writing, such as through e-mail exchanges.
- 5. Team up.** Find someone else you can work with and team up. Sometimes splitting the work can make things happen. Use Google Documents or other similar programs to share your work and update notes.
- 6. Build credibility.** If you complete some record-based projects then your boss is more likely to cut you more time to take on bigger projects.
- 7. Get inspired.** During lunch, visit FOI websites (see Access Resources at end of handouts) to see the great work other journalists are doing with documents. See the challenges they face. Even though it seems like your readers and sources might not seem to care about access, know that you aren't alone. There are others out there like you.

Planning your FOI request

By Charles Davis and David Cuillier

Learn the law

Public records laws require government agencies to provide anyone the right to look at a record (or pay for a copy) that is held by a government agency subject to the law.

You can become fairly knowledgeable by reading a summary of the state public records law provided by the Reporters Committee for Freedom of the Press at: www.rcfp.org/ogg. See the resources listed at the end of these handouts for guides in your state.

Here are some basics of access law:

- No law requires an official to talk to you, but records laws require agencies to let you see documents or data.
- “Record” generally includes any format of recorded material, including paper, audio tapes, video, data, e-mail, and even the electronically embedded properties information in a Word file. Be creative.
- Federal executive agencies (e.g., FBI, but not the Supreme Court or Congress) are subject to the federal Freedom of Information Act. State executive agencies, cities, school districts and other local public agencies are subject state public records law. Be sure to know the name of your state law, and don’t ask for a record from your local school district based on federal FOIA.
- Other laws may apply, such as the Family and Educational Rights and Privacy Act for protecting educational records or the Health Insurance Portability and Accountability Act for medical records.
- Some records may be kept secret if there is a law that says the record may be kept secret, usually to protect national security, privacy invasion, etc.
- Some laws and agencies require a written request.
- Agencies are required by law to respond within a certain amount of time. They may provide the records, deny them in whole or in part (legal reason in writing), or say they need more time.
- Most laws are discretionary, which means an agency can give out the information even if an exemption allows them to keep it secret.

- Denials may be appealed to the agency. A requester can also sue, in some states recouping his or her legal fees by substantially prevailing in court.
- When in doubt, ask for the record. It is up to the agency to prove it is secret, not for you to prove it is public.

Know the record

Identify exactly what you want to the best of your ability. Here are some tips for finding the existence of records:

- Check the agency's website and see if the record is provided online. Or perhaps information is provided online about the specific record.
- Visit or call the agency and talk to a clerk or person who would know what records are kept that would have the information you need.
- Look for original blank forms that the agency keeps to know what kinds of information is kept and how it is kept.
- Look at an agency's retention schedules or records indexes to find what kinds of records are kept.
- Ask to see the log of public records requests to see what other people have requested.

Request the record

- **Avoid fishing.** Try to limit your request to what you really want. If you simply ask for "all files relating to" a particular subject, you may give the agency an excuse to delay its response, and you risk needlessly running up search and copying costs. Do your homework. Go talk to the agency first.
- **Get specific.** Cite relevant newspaper clips, articles, congressional reports, etc. If the records have already been released, let the agency know the date, release number, and name of the original requester. If you are asking for a database, talk with the techies ahead of time to know exactly what data you are requesting and in what format. Tour the agency office and ask about what they are working on and specific documents they maintain.
- **Ask verbally.** Ask for the record verbally in person first, if possible.
- **Be polite but persistent.** The people on the other side of the counter don't come to work with horns and cloven hooves. They are people too, and they are more likely to get you what you want faster if you are nice about it, especially at the beginning.

- **Prioritize.** Let the agency know if you'd like to receive information in a particular order. Materials could be reviewed and released to you in chronological or geographical order - or you may simply not want to wait for all the records to be reviewed before any are released.
- **Submit a written request.** If you anticipate balking, bluffing, or being passed around or put off, simply submit a public records request letter, which starts the clock ticking and requires them to act and stop passing you around or delaying. On the following pages see a sample state public records request letter generated from online request letter generators.
- **Choose your tone.** Note the last paragraph of the request letter that threatens litigation. Threaten to sue only if you are prepared to do so and if they've indicated they will not cooperate. Also, consider whether the wording may create defensiveness or hostile undermining of your request (e.g., delays). Sometimes it's better to attract flies with honey than vinegar. But at other times, coming in strongly and quoting the law can demonstrate you are serious and know what you are talking about (research indicates the threatening letter gets more agencies to respond).
- **Decide on your own transparency.** Legally, you don't have to say who you are or why you want the documents. As a practical matter, you'll probably have to tell them your name and provide a phone number so they can contact you. Also, some states have different standards for commercial users, so you might have to sign a statement saying you aren't a commercial user (they don't consider journalists as commercial users). If you don't care if the agency knows why you want the information, feel free to tell them. It's likely to speed the process and they might offer other information that you didn't request. But if that would jeopardize your investigation, then don't tell them. If they ask, "Why do you want that information? Are you going to write something negative?" Just tell them, "I don't know what I'm going to write until I gather all the facts," which is true.
- **Go to the top.** Sometimes going straight to the agency's lawyers or top officials speeds things up. Clerks sometimes deny requests or stall as they try to make sure they don't release something that will get them in trouble. Once the agency attorneys look at it and see it should be released, it often is.
- **Keep records of records.** Keep track of every step of your different requests. Keep dates, contact names, phone numbers and try to correspond by email so you can have written records

of what was said to whom. Some requests can last years, so keeping track of details can help.

- **Follow through.** After you submit a request, always follow it through to the end, especially if they provide the records, even if months after you need it. Also, if denied initially don't skulk away cowed. If you have a legal right to the information keep at it. How you treat requests and denials will affect how agencies treat requests in the future. Educate officials and get them in the habit of providing information to you and the public. It's part of their job.

RE: Public records request

To whom it may concern,

I know you are busy, but I want to thank you in advance for helping me gather some public records regarding superintendents and high school coaching salaries. I am writing to request a copy of the contract for the district superintendent, including pay and any other compensation he or she might receive. Also, if your district has a paid high school head football coach, or several head coaches, I would like a copy of that person (or persons') contract, including pay and any other compensation they receive for their duties.

I would be happy to pay copying and postage fees and help in any way I can, but if the cost is more than \$5, please contact me and let me know. If the files are available electronically and would be more convenient to copy and email, then that would great too.

I would very much appreciate a response by the end of the month, and if there is information that I am not entitled to, please let me know. I understand that sometimes some information doesn't warrant disclosure for statutory reasons, and might need to be blotted out while releasing the public part.

If there is anything I can do to help with the request, please do not hesitate to let me know (email is the fastest way to reach me).

Thanks again for your help!

Sincerely,

Jane Jones

RE: Public records request

Superintendent Comeau,

Pursuant to the state open records act, I request access to and copies of the contract for the district superintendent, including pay and any other compensation he or she might receive. Also, if your district has a paid high school head football coach, or several head coaches, I would like a copy of that person (or persons') contract, including pay and any other compensation they receive for their duties.

I agree to pay reasonable duplication fees for the processing of this request.

If my request is denied in whole or part, I ask that you justify all deletions by reference to specific exemptions of the act.

Thank you for your assistance.

Sincerely,

Jane Jones

RE: Public records request

Superintendent Comeau,

Pursuant to the state open records law, Ariz. Rev. Stat. Ann. Secs. 39-121 to 39-126, I write to request access to and a copy of the contract for the district superintendent, including pay and any other compensation he or she might receive. Also, if your district has a paid high school head football coach, or several head coaches, I would like a copy of that person (or persons') contract, including pay and any other compensation they receive for their duties.

If your agency does not maintain these public records, please let me know who does and include the proper custodian's name and address.

I agree to pay any reasonable copying and postage fees of not more than \$5. If the cost would be greater than this amount, please notify me. Please provide a receipt indicating the charges for each document.

I would request your response within ten (10) business days.

If you choose to deny this request, please provide a written explanation for the denial including a reference to the specific statutory exemption(s) upon which you rely. Also, please provide all segregable portions of otherwise exempt material.

Please be advised that I am prepared to pursue whatever legal remedy necessary to obtain access to the requested records. I would note that willful violation of the open records law can result in the award of legal costs, including damages and reasonable attorney fees. See Ariz. Rev. Stat. Sec. 39-121.02.

Thank you for your assistance.

Sincerely,

Jane Jones

How to handle denials

By Charles Davis and David Cuillier

IF THE AGENCY SAYS...

"YOUR DESCRIPTION OF THE RECORD IS INADEQUATE"

This means you probably did not give enough specific identifying information. Give the agency the benefit of the doubt and rewrite your request. You can try to call or make an appointment with the official processing your request to get more help.

"THE RECORD DOES NOT EXIST"

If you are reasonably certain the records you've requested do exist, and if your request letter was clear and informative, you should try to do more research. Are there news reports, congressional hearings or court records that describe the information you want more clearly?

Rewrite your request, giving the agency more guidelines and clues for where they might find it. Try to be as patient and understanding as you can; some agencies are short staffed or have disorganized data systems.

"SOME OF THE INFORMATION IS EXEMPT FROM DISCLOSURE, SO WE WON'T GIVE YOU ANY OF IT"

The agency can't withhold an entire document or file because some portion(s) of it is exempt from disclosure. The agency must release any non-exempt material that can be reasonably extracted from the exempt portion(s).

"WE CAN'T GIVE IT TO YOU BECAUSE AN EXEMPTION SAYS WE HAVE TO KEEP IT SECRET"

FOIA exemptions are generally discretionary, not mandatory – an agency is not required to withhold all information. Agency officials can choose to waive the exemptions and release the material, unless another statute specifically restricts that disclosure. One exception is FERPA, but note that FERPA doesn't cover everything and they can release the records if identifying information of a student is blotted out.

"OUR PROPRIETARY SOFTWARE DOESN'T ALLOW US TO COPY DATA"

I don't know of any software that can't copy or export data. Maybe it exists, but it must be rare. Usually the person saying that is unfamiliar with the software and needs to confer with the agency computer technicians. If, after talking to their techies, they still stick to that story, find out the software maker and call them up. No doubt the company will want everyone to know how useful and versatile the software is and explain how to copy the data.

"COPYING THE DATA WITH FIELDS REDACTED WOULD CREATE A NEW RECORD, AND WE ARE NOT REQUIRED BY LAW TO DO THAT"

It is true that most laws do not require government agencies to create new records, only let you see or copy existing records. But you aren't asking for a new record – just a copy of their existing records with some information redacted. It's no different from getting a copy of a paper file with some information (fields) redacted with a black pen. Just because they blot out a name on a piece of paper doesn't mean it's a new record. Same theory applies to data. Copying data with some fields redacted, or even combining fields from different databases, is not creating a new record. It's copying existing data.

"OK, OK. HERE IS YOUR PILE OF RECORDS. THAT WILL BE \$1 MILLION, PLEASE."

Make them justify the expenses with a line-by-line explanation. You might be able to narrow your request to get fewer documents that would still serve your purposes. Arm yourself with what other agencies charge for copies, including for computer programming time. If many other agencies charge nothing or very little, then make that known, including by writing a story about it.

Look at the agency's FOI logs to find out if others have been receiving the same records. Ask for an extra copy. Ask for a backup copy of their data if they make backups. Get an outside expert to scrutinize their time estimates. The estimates are usually inflated and unreasonable. See the handout on Lowering Copy Fees for more tips on reducing copy costs.

"WE ONLY PROVIDE THIS INFORMATION TO RESEARCHERS. YOU CAN HAVE IT IF YOU SIGN THIS CONTRACT WITH US."

Some agencies give information to researchers provided they sign a contract with use restrictions, such as prohibiting identification of individuals in the records. Few reporters are willing to sign such agreements. The problem is you might want to use the information for something else later and won't be able to. Also, fundamentally it designates journalists as above average citizens with special access, and it creates a new category of "public information." Either it's public or not. Some journalists advise only considering such agreements when the information is clearly not public but the agency is willing to release it for your story.

"WE DON'T KNOW WHY YOU WANT IT OR HOW YOU MIGHT USE IT. YOU MIGHT USE IT IN A WAY WE DON'T LIKE."

Tough noogies. In most states a records request cannot be denied based on who the requester is or how the information will be used (except in the case of commercial mailing lists in some states). If they ask why you want the information you can tell them: "I wouldn't want to determine the story before I have all my facts. I'm just doing my job at gathering information." If you request records routinely from an agency (weekly), then it will be no big deal and they are less likely to question you.

"WE JUST DON'T WANT TO GIVE IT TO YOU"

The agency must explain its reasons, usually in writing, for determining that an exemption applies to any particular information.

- You have the right to contest any exemption claim.
- The exemptions must be narrowly applied, since the FOIA was created to maximize public access to agency records
- You can file an administrative appeal to a higher agency official. And if this fails, you can file a lawsuit. The federal court must conduct a full judicial review of the agency's claims and it is up to the agency to justify its denial of your request.
- Even if the agency releases substantial portions of the material you've requested, you can appeal the decision to "sanitize" the rest. You can also request a detailed justification for each deletion.
- You can ask the state public records ombudsman to step in and try to mediate. The ombudsman has the authority to

look at records behind closed doors to see if the agency is following the law (although the ombudsman has no enforcement authority).

- While you are haggling with the agency, try to get the information from another agency. Some records are kept by multiple agencies (for example, boating accident data kept by state agencies and the Coast Guard).
- Use principled negotiation and hard tactics, as detailed on the following pages.

Lowering Copy Fees

By David Cuillier

Here are some tips for lowering or eliminating unreasonable fees:

- Don't ask for copies. Look at the documents for free. In most states an agency can't charge for search fees, only for copies.
- Narrow the request to just the few pages that you really need.
- Ask for a fee waiver as a researcher using the information for the public good (federal FOIA provides waivers for journalists).
- Take photos or use a portable scanner (about \$100).
- Ask for electronic files on CD or e-mailed for free.
- Ask the agency for an itemized list of expenses to justify the costs. Here is what I consider reasonable: Add paper (.7 cents per page based on a box of paper from Office Depot), machine depreciation (.2 cents per page based on a Xerox WorkCentre 5225 that costs \$4,299 and produces 75,000 copies a month), and toner (.6 cents per page), and you get 1.5 cents per page. Call it an even 2 cents per page.
- Question high staff search fees – \$100 per hour is equivalent to paying someone \$208,000 a year to make copies.
- Request to see a copy of the contract the agency has with a copy company. My employer pays a company less than a penny (.9 cents) per page to provide the machine, service it and refill the toner.
- Survey local agencies to compare costs and expose the unreasonable.
- Survey citizens to find out what they consider reasonable. Most people will say 10 or 15 cents per page copy.
- If the unreasonable charge is for computer programming, call the company that makes the software and ask them if copying data should be time consuming. They often say it takes a few minutes.
- Publicize the unreasonable copy fees. Find out if an agency provides free copies to lawyers or commercial requesters but overcharges citizens. Contact elected officials. Write about it.
- Team with other requesters to share the bill. Request the request logs to see who else gets records frequently from the agency.
- Ask an ombudsman or attorney general to talk to the agency.
- Sue or lobby for laws specifying reasonable fees.

Soft tactics and principled negotiation

By David Cuillier

Below are tips for getting sources to comply with requests, based on the theories and application of “principled negotiation.” These techniques are advocated by such experts as William Ury, co-founder of the Harvard’s Program on Negotiation and author of “Getting to Yes.” I suggest reporters always approach their sources in this frame of mind. With enough practice you’ll get a lot of agencies to comply without threats of litigation.

Argue interests, not positions

Argue for your interest (I wish to analyze ambulance response times to find trouble spots), not positions (I want your database). If the agency understands why you want the information they are more likely to be cooperative. Of course, you are not obligated by law to explain that and you might not want to tip them off. But in reality they can figure it out most of the time so being up front is a good option. Then, they can argue their interest (we don’t want to invade anyone’s privacy). You can work out a solution when you understand interests. Positions cause both sides to dig in.

Allow face saving

If you box an official into a corner early on they might feel like they have to stick to their guns no matter the cost, especially if they denied the information in front of their superiors and subordinates. Talking with the person informally first, before they commit to an action, gives the person more leeway to agree to your request. Or, suggest the legal department examine the issue and let them make the decision – that will relieve the official of the shame of changing his or her mind (e.g., “sorry folks, I had to say yes because the attorneys said I had to release it.”)

Use people skills

Allow officials to vent. Listen first, then repeat what you heard (whether you agree with it or not). Use “I” statements, not “You” statements. Talk to people informally side-by-side, not facing across a counter, creating psychological “opposition.”

Apply negotiation jujitsu

Bend like the willow, don’t break like the oak. Invite criticism and advice for how to analyze the information. If they say the record is a waste of time then ask what record would be a better use of time. Use questions instead of statements. Use silence after an unreasonable attack. Invent different options and alternatives, and end conversations with a compliment.

Hard tactics

By David Cuillier

Sometimes you apply the techniques of principled negotiation but an agency just doesn't want to play ball, or purposely chooses not to play fair. Then it's open season and time to apply hard tactics. Below are tips for getting sources to comply with requests, based on the six elements of persuasion by Robert Cialdini of Arizona State University. Also, other strategies are provided for pressuring an agency to release records. Do not use these techniques for evil. Only good.

1. Reciprocation

- **Rejection-then-retreat:** Ask for a lot, then cut it in half. "Can I see all your expenses in database format for the past 20 years? OK, how about starting with just the expense reports for the past five years?" The clerk will appreciate you for simplifying the request and may reciprocate by working faster and being more helpful. Request information that you can give up later, such as social security numbers. If it lands in court a judge might want you to concede something anyway. When it appears you are giving them something then they are more likely to reciprocate.
- **Get-to-know-you stories:** Don't ignore newsworthy positive stories. Occasionally government actually does something right. It's often useful to do a harmless newsworthy project first to get to know people and build trust (e.g., analyze pet license data for a feature on most popular dog breeds/names), then work from there. When you do something positive to someone, psychologically they feel obligated to reciprocate and help you out even more. But don't make up stories or get buddy-buddy. Readers come first.
- **Be a helper:** Check in frequently after the request is filed and offer to help to make their jobs easier. Offer to help copy data or provide CDs for copying. They might not take you up on it but they might appreciate the gesture.

2. Commitment and Consistency

- **Everyone happy:** Ask, "How are you doing today?" When the person says fine, then he or she is more likely to help you. People don't want to appear stingy when they are fine and you are not.
- **Commitment:** Once commitment is made, people try to stick to it. Get commitment verbally: "Do we have an agreement?"

- **Ratcheting (low-balling):** Get a commitment for something small, then it opens the door for getting a “yes” on something bigger. This is the opposite of the reciprocation techniques. “How about if I could see a copy of what a police report looks like. OK, do you have what a case file would look like? What does it look like in your computer system? Any chance I could just get an electronic copy of your reports in Excel for the past year?”

3. Social Proof

- **Peer pressure:** We follow what we see everyone else doing (e.g., canned laughter). This is most effective when people are uncertain and when the reporter is similar to the person. “Boy, all the other towns in the county provide this information. I wonder why it isn’t open here?”
- **Patriotism:** Focus on the importance of what they have to offer to the community. That it’s their duty as Americans to keep government open and transparent, and the community will appreciate it.

4. Liking

- **Looks:** As much as we hate to admit, people often make decisions based on how a requester looks. Dressing well helps; looking shady usually raises suspicions and increases denials.
- **Similarity:** Dress like your sources. Act like your sources. Talk about similar interests.
- **Compliments** that are sincere help.
- **Association:** Disassociate yourself with negative media and people who use information irresponsibly (spammers, identity thieves). Go to lunch with people for a positive association with you and food.

5. Authority

- **Bigger gets better responses.** Journalists from bigger media have more “authority” and tend to get calls returned faster. If you work for a smaller organization, consider teaming up with reporters from other organizations. Cooperative requests can increase pressure for release and serve everyone’s interests.
- **Titles have authority.** Have the request letter co-signed by the managing editor or, depending on the importance of the information, the publisher. Or have the organization’s attorney send it.
- **Government allies.** Get people in government on your side to back you up. Get to know the state attorney general, your state

records ombudsman, or others who might be respected in government.

- **Shallow but effective.** Symbols of authority are effective: titles, clothing, automobiles. Even height conveys authority.
- **Cite the law.** The law is authoritative, particularly if it has penalties for noncompliance. Include the citations in your requests and e-mails when you want to exert authority.

6. Scarcity

- **For a limited time only.** What you are offering is limited. "I don't have time to wait until next week for you to check with the attorneys on this. My deadline is in six hours. Either I get the information or I'm going to have to write a story for tomorrow morning's paper explaining that your agency is withholding it. I would hate for you all to look like you are hiding something and are bad officials when I know you aren't. The public will appreciate it."

7. Pound lawbreakers into submission

Sometimes you run across a few bad apples in public service (just like there are some bad apples in journalism) who deliberately act in bad faith and deny valid public records requests to hide corruption or embarrassing facts. Remind them who's boss (the public):

- **Go to the top.** Go to the elected officials and ask them why the agency is hiding information. Sometimes elected officials, especially during an election year, would rather avoid a public battle with journalists.
- **Write about it.** Some journalists say it's inside baseball but that's hooey. When an agency says "no" to you, they aren't saying "no" to you. They are saying "no" to the thousands or millions of people in your community. Tell those people. Quote access experts and show why the agency is breaking the law. You would write a story if the agency broke other laws, right?
- **Wave the flag.** Use patriotism as leverage. Communists and Nazis favor secrecy, not god-fearing Americans. Are your officials pinkos and hate America, or are they good citizens?
- **Expose the deviant.** Get the same information from other agencies then ask the secretive officials why they are deviant. Nobody wants to be an outlier.
- **Rally allies.** Find people and groups who want the information and go tell them about the secrecy. It's even better if they are influential business owners, contributors or active citizens. When

officials see it isn't a media issue, and they fear the wrath of constituents, they yield.

- **Heads on pikes.** Put together a list of all the other agencies in your state or elsewhere that lost public records battles and had to pay tens of thousands of dollars in lawyer fees (including the requesters' fees). Show them the news articles that made the agencies look bad. When officials see the very real drawbacks of secrecy (heads on pikes), they might wave the white flag.
- **Bury them.** If they deny your valid request and are being stubborn, flood them with more requests. If they are trying to hide one record, you can tell them that you wonder what else they are trying to hide. Make it much more work to deny you records than to comply. Wear them down.
- **Release the hounds (lawyers).** Have your attorney write a terse letter citing the relevant law. The letter, while perhaps unbudgeted, can demonstrate you are serious and will pay off down the road with more records.
- **Sue.** Sometimes all it takes is filing a lawsuit and an agency will cough up the information. In many situations you can recoup your attorney fees, even if you don't go to court. Check out the new NFOIC litigation fund (<http://www.nfoic.org/>) that will cover litigation to fight for records.

Posting data online

By David Cuillier

Here are some programs you can check out for posting data online for the public, from the simple, cheap and easy, to the complicated and expensive:

1. Google Fusion Tables

<http://www.google.com/fusiontables/>

This is a free service for posting data online and making it look fancy through maps and other visualization techniques. You can upload data, share it, and allow people to update it if you want.

2. Socrata

<http://www.socrata.com/>

This is cheap and easy, and is used by the White House. For no cost you can post online fast and share it with the world. The databases are kept on the Socrata server, though, and it is limited in space.

3. Tablesorter

<http://tablesorter.com/>

This program gives you a little more control over your content and looks professional. It's also free (they ask for a donation if you like it). The downside is you have to know html to be able to integrate it into your website, but any Web person should be able to work with it.

4. Caspio

<http://www.caspio.com/>

This is a really nice program, and it even uses point-and-click interface for ease of use. It's very slick and has some great features. It can be a little more expensive, though. It ranges from \$39.95 per month for the "value" package to \$349.95 per month for the corporate package.

5. Django

<http://www.djangoproject.com/>

This is a high-end program that requires a person to know Python programming language. It appears to be growing in popularity.

6. Other programs

Other programs that you can check out include DataGrid, DataTables, Tableau public, Simile exhibit, and Tablesetter (open-source software created by ProPublica).

Data ethics checklist

By David Cuillier

Here is a checklist to review when dealing with data (also, see the SPJ Code of Ethics, <http://www.spj.org/ethicscode.asp>):

1. Is the database accurate?

Often an agency will provide data that have been compiled in a hurry, changed from year to year, or just garbled. Take an excerpt of the data and verify it is accurate. Clean it up. Some people say it's OK to take post government databases online raw, and if there are inaccuracies it is the government's fault. That is true, legally, but journalists have an ethical duty to verify and publish the truth.

2. Did I analyze the numbers right?

When you get your findings, run them past the agency to see whether they find errors. You want to give them the chance to reply, and they can't prevent you from publishing it. Don't provide the entire story to an agency before publication, but it doesn't hurt to present key findings.

3. Should I withhold some of the data from the public?

Just because we have a legal right to acquire public data doesn't mean we have to publish everything. We might get databases that include home addresses. In some situations that might be important to publish online (sex offender data). In other situations the harm in publication might outweigh the benefits (database of child beauty pageant winners).

4. What would my mom/aunt/grandma/neighbor/child think?

Apply the sniff test to determine whether publication of the data might evoke a public backlash that could lead to closure of the records. This has happened many times around the country, particularly when data include home addresses (concealed weapons permits) or other sensitive information (911 recordings). People worry about privacy invasion and will call for blanket closure of records. That doesn't mean we don't publish data if they have any whiff of personal privacy. But if we do, we must have a clear and defensible reason that we explain up front.

5. Am I pursuing data aggressively in the public's interest?

A lot of journalists don't write about denials because they say it's inside baseball, or a conflict of interest. However, it is the ethical responsibility of journalists to fight for records on behalf of the public. Agencies aren't saying "no" to you – they are saying no to the thousands or millions of fellow citizens. When government breaks the law (including the state public records law), tell people.

Top-10 open meetings red flags

By Joel Campbell

1. **Retreats.** Just because a public body wants to meet at the beach for a retreat doesn't mean the open meetings law doesn't apply.
2. **Attorney-client privilege.** Some public bodies try to skirt the open meetings act by claiming attorney-client privilege, calling the attorney into executive session when they want secrecy. Question such ploys.
3. **Stealth agendas.** If the agenda says minutes, old business, new business, begin challenging the public body for more information. If the agenda says the public body is closing the meeting to discuss "personnel" ask for specific details about the meeting closure.
4. **Boilerplate closures.** In some states, city councils include an "executive session" on their agenda as a matter or practice whether they really need it or not. This encourages closed meetings and violates the spirit of open meeting laws.
5. **Electronic meetings.** Some states allow meetings to be conducted over the telephone or via video or audio conference. However, such meetings usually require that journalists and the public can listen or watch. Also watch for agencies conducting public business via e-mail.
6. **No votes for executive sessions.** Laws sometimes require that a majority vote be taken to go into closed session. Keep public officials honest and demand votes be taken.
7. **Work meetings or committee of the whole.** In some places, public bodies hold regular "work sessions," "committee of the whole meetings" or "work meetings" before their regular meetings. These often are designed to discuss matters informally and line up votes.
8. **Vague times and locations.** Some boards have attempted to approve closed meetings for a non-specific time and location in the future. In some cases these have been used to bring in candidates for job interviews. Object to such tactics.
9. **Get the meeting documents.** Ask for the same information packets the members of the board or council receive. These are public documents and can help you be more thorough in your reporting.
10. **Diffuse the open meetings bomb.** If a discussion scheduled for a closed meeting looks like it might violate the law, make a phone call before the meeting and try to persuade public officials to discuss the agenda item in question in the open. Some states have FOI hotline attorneys who may be consulted.

Access resources

Arizona First Amendment Coalition

<http://arizonafoi.com/>

This group, comprised primarily of journalists in Arizona, advocates for open government.

Arizona Media Hotline

<http://www.ananews.com/wordpress/index.php/member-services/legal-advice-services/>

A hotline for reporters needing help figuring out public records laws: 602-351-8000. Funded by the First Amendment Coalition and answered by attorneys from Perkins Coie Brown & Bain.

Arizona Public Records Ombudsman

<http://www.azleg.state.az.us/ombudsman/default.htm>

This office started mediating access disputes in January 2007 out of the state Attorney General's office. A good way to get an impartial government person on your side to work out disputes.

Arizona Reporter's Handbook on Media Law

A good summary of access in the state, along with other media law issues.

To order a copy for \$5, contact Sharon Neilson at 602-351-8014 or SNeilson@perkinscoie.com. For more information, contact Dan Barr at 602-351-8085.

Reporters Committee Arizona open government guide

www.rcfp.org/ogg (then click on Arizona)

A great guide to the public records law and open meetings law in Arizona, written by Arizona media law attorney Dan Barr. It describes the different pieces of the law in plain English. A must-have resource for everyone.

Arizona Newspapers Association

<http://www.ananews.com/>

A good source of news on FOI issues in the state and help for dealing with access issues.
